**Notes:**

- Download non-submittable worksheet: pre-FAFSA\_worksheet.pdf is for the 2001-2002 cycle
- The NCS doc: 12-606 page 2 states some of the info. included above. This is specifically gear toward the year **2001-2002**. If this is incorrect and other years need to be chosen: At what point does the user choose the school year? Before or after PIN confirmation? Or does the system read the database and provide the content from the most recently submitted information and then let the user choose at that time.
- Help Button: NCS doc. details a help function. is this REALLY needed?

**Notes:**

- User information is checked against "Mainframe Temporary database." refer to doc. 12 -603 page 80.  
*"Open a Saved Application."* This is for RENEWALS also. See Process Flow Renewals Doc. 12 -606 on page 24
- doc. 12-603 page 80 states the need to identify which type and which year of application the user is opening before going to login page.  
Should this be designed this way for this release? or is this not going to impact anything because the user will not be able to open a 2000-2001 saved application when this is released? Also, should the design of this release allow for future additions to the type and year of the application to be released?

## Forgot Your Password?

If you forget your password, you cannot retrieve the FAFSA you saved. Neither Customer Service nor the U.S. Department of Education has a record of your password due to security reasons. This is to protect you and your information.

If you had a saved FAFSA on the Web, Renewal FAFSA on the Web or Corrections on the Web and have forgotten your password, you will need to start over.
